## Foreign License Conversion

Get your American license quickly and securely

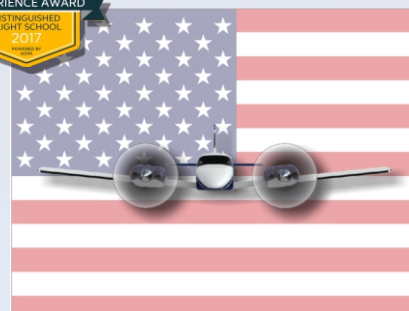

The first step towards conversion should be the analysis of the minimum requirements of the foreign license and the minimums of the American license. For example:

### Commercial Pilot License

Foreign Minimum	USA Minimum
150 Hrs	250 Hrs

In the above example we can verify that the minimums are different in the two countries, so if you have the Commercial Pilot license in your country but do not have the 250 hours, we must create a program so that you reach this minimum before the conversion.
